FOREWORD

This is the sixth in the series of the publication titled World Weather Records. The earlier issues, which included climatological information through 1960, have had global distribution and have been widely used for meteorological and climatological research. This volume provides data for North America for the 1961-70 period.

At its Sixth Session in Bad Homburg, Federal Republic of Germany, in October 1973, the Commission for Special Applications of Meteorology and Climatology (CoSAMC) of the World Meteorological Organization, in Resolution 7, accepted the offer of the United States to digitize and publish the "World Weather Records, 1961-70." The United States' National Climatic Center agreed to collect and edit the 1961-70 data for Region IV (North America). It was suggested that Regional Associations I, II, III, V, and VI arrange in the most suitable way within each Region for the collection and preparation for publication of the data in the "World Weather Records, 1961-70."

The United States extends its gratitude to the meteorological services and other organizations who graciously supplied data. The present volume for North America contains data for all countries that were included in previous issues of World Weather Records.

EDITORIAL NOTES

This issue of the World Weather Records is primarily concerned with data for 1961-70. As in previous issues, data for earlier years have been included when appropriate and available. The first issue included data from earliest records available at that time up to 1920. Data for the periods 1921-1930, 1931-1940, 1941-1950, 1951-1960 were published in succeeding issues. The present volumes continue, insofar as possible, the record of monthly mean values of station pressure, sea level pressure, temperature, and monthly total precipitation for stations listed in previous volumes.

Information concerning the exposure of instruments, hours of observations, and methods of adjusting or correcting observational data has been included in station notes whenever it was supplied.

Lake levels, freeze and thaw dates, and sunspot numbers are included. No attempt has been made at a world-wide coverage of these statistics beyond a general request to countries to send these data whenever available.

SOURCES OF DATA

Unless otherwise stated in the notes, data were supplied to the regional collector by national meteorological services whose addresses may be found in publications of the World Meteorological Organization. The data have been published as received by the United States from the regional collector. CLINO data are long term means taken from the World Meteorological Organization publication, Climatological Normals (CLINO) WMO/OMM - No. 117 T.P. 52 or are values supplied by the respective authorities.

GROUPINGS OF STATIONS AND ARRANGEMENT OF DATA

The six volumes of this issue of the World Weather Records have been so arranged as to provide a natural geographic separation into what are essentially units of a single continent. Two of the volumes, however, contain island and Ocean Weather Station data as well as those of the smaller continents. Insofar as possible the National Climatic Center has also drawn upon the World Meteorological Organization structure for guidance. For example, Israel and Jordan, which are Members of the World Meteorological Organization Region VI - Europe, appear in the volume for Europe.

Within each volume the data are presented alphabetically by station within geographic areas which usually, but not necessarily, coincide with political entities.

Three means of locating desired informaion have been included. The Table of Contents at the beginning of this volume lists, for the data included, the major geographic divisions or countries, giving page numbers for notes and data as well as pages where lake levels, freeze and thaw dates, and sunspot numbers may be found. The two indexes at the rear of this volume provide information in greater detail. The first is a master list of all locations, station or area included in the particular volume, listed alphabetically without regard to geographical division or country. In the second index, station names are listed in alphabetical order for each major geographical area or country.

The data listing for each station is headed with the name, latitude, longitude, and elevation at the close of the period for which data are published, and the geographic subdivision or country within which it is located together with the WMO number wherever one has been assigned. Also included are the page numbers where the station notes may be found.

Lake and river levels, sunspot numbers, and dates of freezing or thawing of rivers or lakes are grouped in separate sections following meteorological data.

ADJUSTMENTS FOR HOMOGENEITY

Previous issues of the World Weather Records have provided for homogeneity of records by adjusting the most recent period of record to the earlier period. In this volume data have been published as received. No attempt has been made to correct for relocation of stations or changes in instrumentation or procedures. Each meteorological service was requested to provide, with the data, information concerning exposure, changes in location, instruments and observations or any other factors which might affect the homogeneity of the record. These have been included in the Station Notes whenever supplied.

CONVERSION OF UNITS

All data are presented in metric units as received.

The totals of precipitation are understood to include all forms of precipitation: rain, snow, sleet, hail, etc. The water equivalents of solid precipitation are given after melting, weighing, or estimating. The letter "T" denotes an amount of precipitation more than zero but less than one-half millimeter.

METHODS OF AVERAGING

Monthly period means are the sums of the monthly means divided by the number of years for which data are available. Annual means of pressure and temperature are one-twelfth (1/12) of the sum of the monthly or period means. Annual precipitation totals are the sums of the twelve monthly totals or monthly period means.

UNITS IN STATION NOTES

The units of height and distance used in the station notes are those furnished by the respective countries and are metric.

H_{pc}: Height (above mean sea level) to which station pressure shown in this volume has been reduced. If different heights have been used for different periods, the information is carried in Station Notes.

H_z: Height of the barometer above mean sea level for the period shown.

H: Height of the ground at the station above mean sea level.

h_t: Height of the thermometer above ground.

h_r: Height of the rim of the precipitation gauge above ground.

Lat.: Latitude of the station.

Long.: Longitude of the station.

E: Data have been estimated by the method described in the Station Notes for that station, or are based on incomplete data, or are uncertain for some other reason.

ALASKA

ALASKA (26 Stations)

General: Station names, elevations, and coordinates given in the table headings are those in use at the end of 1970 or the last year for which data are published.

For stations having pressure data, the value H_z, height of the barometer above mean sea level, is used in the heading; for stations without pressure data, the elevation is H, height of the ground above mean sea level at the station.

STATION PRESSURE: Monthly means of station pressure were computed using all digitized observations available (TD 1440) as input, and applying the formula,

$$P_{Hpc} = P_{Hp} \times \exp[(\psi_2 - \psi_1)/R\ \overline{T}^*]$$

where $\overline{T}^*$ is assumed ≈T (actual temperature in °C+273.16°K). $\psi_2 - \psi_1$ = difference in geopotential meters between the station pressure observation height and the climatological station pressure height.

$R = 2.8704 \times 10^6$ erg/g°K
P_{Hp} = Station Pressure
P_{Hpc} = Climatological Station Pressure

SEA LEVEL PRESSURE: Monthly mean sea level pressures were computed by summing all observed station pressures reduced to sea level (TD 1440) and dividing by the number of observations.

TEMPERATURE: The monthly mean temperature was computed by using one half the sum of the monthly mean daily maximum and monthly mean daily minimum temperatures. The monthly mean temperatures have not been adjusted for changes in location.

PRECIPITATION: These data were measured using either a weighing rain gauge, a triple register rain gauge, or an 8 inch rain gauge.

CANADA

STATION NOTES

Canada (78 Stations)

General

Precipitation is measured separately as rainfall in the gauge or snowfall water equivalent or as snowfall on the ground. The total monthly precipitation consists of the rainfall plus the snowfall water equivalent or the rainfall plus 1/10 of the snowfall.

The monthly mean temperatures are derived from the mean of the daily maximum plus the mean of the daily minimum divided by 2.

The monthly mean pressure values are the means of the twenty-four hour observations.

Established elevation is the elevation determined for the barometer cistern when the instrument was initially installed. It is the elevation at the station established as the datum to which barometric reports at the station refer. The established elevation usually remains unchanged throughout the history of the station even though the barometer cistern elevation may change because the barometer was relocated at the station. At those stations where the barometer cistern height is less than 50 feet above mean sea level, an established elevation of the datum MSL is assigned to the station.

In the station notes, h_t is the height of the thermometer above ground, h_r is the height of the rim of the rain gauge above ground and H_z is the height of the barometer above mean sea level for the period shown.

Clino values are based on the 1941-70 period.

Alert, Northwest Territories

Site: On the northern tip of Ellesmere Island, 726 km. from the North Pole. h_t - 1.2 m. h_r - 0.5 m.

Arctic Bay, Northwest Territories

Site: On the north shore of Arctic Bay which is surrounded by hills close to 300 m. high. h_t - 1.1 m. h_r - 0.8 m.

Armstrong, Ontario

Site: An airport approximately 24 km. NW of Lake Nipigon in rolling, heavily wooded terrain. H_z originally 324.6 m., barometer relocated November 1968, new H_z - 321.6 m. h_t - 1.1 m. h_r - 0.3 m.

Bagotville, Quebec

Site: An airport, approximately 16 km. from Chicoutimi near the Saguenay River on a level plain rising to wooded mountains over 915 m. high, about 32 km. south. H_z originally 163.4 m., barometer relocated December 1965, new H_z - 157.5 m. h_t - 1.1 m. h_r - 0.3 m.

Baker Lake, Northwest Territories

Site: A small settlement on Baker Lake about 225 km. NW of Chesterfield Inlet. Terrain is flat, open tundra. h_t - 1.2 m. h_r - 0.4 m.

Barkerville, British Columbia

Site: An old historic mining village in a narrow valley running in a NNE - SSW direction. h_t - 1.2 m. h_r - 0.4 m.

Belle Isle, Newfoundland

Site: On an island, approximately 59 km. N of St. Anthony and 27 km. from the nearest mainland which is Labrador. Station closed January 1970. h_t - 1.1 m. h_r - 0.5 m.

Calgary, Alberta

Site: An airport, on a nearly flat table-land, extending for several kilometers beyond the City's northeastern outskirts. h_t - 1.4 m. h_r - 0.3 m.

Cambridge Bay, Northwest Territories

Site: An airport, on rocky uneven Arctic Tundra, which is 3.6 km. ENE of Cambridge Bay Village. h_t - 1.1 m. h_r - 0.3 m.

Cape Race, Newfoundland

Site: Rolling treeless area with the Atlantic Ocean NNE to SW. Station closed January 1966 and reopened at a new site December 1968 but closed again July 1969. h_t - 1.4 m. h_r - 1.4 m.

Charlottetown, Prince Edward Island

Site: An airport, approximately 4.8 km. N of the City of Charlottetown. Surrounding country is flat. h_t - 1.1 m. h_r - 0.3 m.

Chatham, New Brunswick

Site: An airport 1.6 km. S of the town of Chatham in fairly level, generally well wooded terrain, about 16 km. from the mouth of the Miramichi River. h_t - 1.1 m. h_r - 0.3 m.

Chesterfield, Northwest Territories

Site: On the south shore of Spurrel Inlet. h_t - 1.3 m. h_r - 0.3 m.

Chicoutimi, Quebec

Site: Located about 3 km. N of the Chicoutimi River. h_t - 1.1 m. h_r - 0.3 m.

Churchill, Manitoba

Site: An airport, approximately 8 km. ESE of Churchill townsite. Surrounding country is very flat. H_z originally 35.3 m., barometer relocated August 27, 1962, new H_z - 35.2 m. h_t - 1.1 m. h_r - 0.3 m.

Clyde, Northwest Territories

Site: On the NE coast of Baffin Island. h_t - 1.2 m. h_r - 0.3 m.

Coppermine, Northwest Territories

Site: Located about 1 km. W of the entrance of the Coppermine River and 200 m. S of the Arctic Coast. H_z originally 8.7 m., barometer relocated August 1967, new H_z - 9.1 m. h_t - 1.4 m. h_r - 0.3 m.

Coral Harbour, Northwest Territories

Site: An airport on the south shore of Southampton Island lying between Fox Channel and Hudson Bay. Terrain is rolling, open tundra. h_t - 1.1 m. h_r - 0.3 m.

Dawson, Yukon Territory

Site: In the town of Dawson, which is in the N - S valley of the Yukon River. H_z originally 319.1 m., barometer relocated July 20, 1964, H_z - 321.4 m., relocated April 8, 1968, new H_z - 321.5 m. h_t - 1.2 m. h_r - 0.3 m.

Edmonton, Alberta

Site: An airport, located within the boundaries of the City of Edmonton, 3.2 km. to the NW of the main business centre. h_t - 1.2 m. h_r - 0.4 m.

Eureka, Northwest Territories

Site: On the southwestern section of Ellesmere Island. Approximately 11 km. E of the mouth of Slidre Fiord on the N side. H_z originally 3.8 m., barometer relocated July 1, 1963, new H_z - 10.4 m. h_t - 1.2 m. h_r - 0.6 m.

Fort Chimo, Quebec

Site: An airport on the west bank of Koksoak River about 48 km. upstream from the outlet into Ungava Bay. Terrain is rolling, open tundra. h_t - 1.1 m. h_r - 0.3 m.

Fort Good Hope, Northwest Territories

Site: Located on a high east bank of the Mackenzie River, approximately 45 m. above the river level. Surrounding country is slightly rolling, lightly treed tundra, with numerous lakes and sloughs. H_z originally 76.8 m., barometer relocated July 1965, new H_z - 52.9 m. h_t - 1.2 m. h_r - 0.3 m.

Fort McMurray, Alberta

Site: An airport, 16 km. SE of the town of Fort McMurray, located at the junction of the Athabasca and Clearwater Rivers. Station originally called "McMurray" but the name changed to "Fort McMurray" January 1963. H_z originally 370.2 m., barometer relocated June 24, 1963, new H_z - 369.7 m. h_t - 1.2 m. h_r - 0.3 m.

Fort Nelson, British Columbia

Site: An airport, approximately 11 km. E of the town of Fort Nelson on the Alaska Highway. Terrain is level and heavily forested. H_z originally 381.1 m., barometer relocated May 4, 1965, new H_z - 380.5 m. h_t - 1.2 m. h_r - 0.3 m.

Fort Simpson, Northwest Territories

Site: An airport on the bank of the Liard River which runs in a SW - NE direction. Approximately 13 km. NW from the town of Fort Simpson. H_z originally 128.6 m., barometer relocated October 11, 1963, H_z - 175.5 m., relocated October 25, 1963, new H_z - 175.7 m. h_t - 1.1 m. h_r - 0.3 m.

Fort Smith, Northwest Territories

Site: An airport on the south bank of the Slave River. Approximately 3 km. W of the town of Fort Smith. H_z originally 202.7 m., barometer relocated April 29, 1969, new H_z - 206.3 m. h_t - 1.2 m. h_r - 0.3 m.

Frobisher, Northwest Territories

Site: An airport almost surrounded by low hills ranging in elevation from 30 - 375 m., lying in a NW - SE line. Approximately 14 km. S - SW of the station lies Frobisher Bay. H_z originally 23.8 m., barometer relocated July 3, 1964, new H_z - 29.0 m. h_t - 1.1 m. h_r - 0.3 m.

Gander, Newfoundland

Site: An airport, approximately 1.6 km. from Gander Lake and about 72 km. from the sea to the north and east. h_t - 1.2 m. h_r - 0.4 m.

Goose, Newfoundland

Site: An airport located on an elevated plateau between the Hamilton and Goose Rivers. The plateau is about 45 m. above mean sea level and comprises an area of about 30 square kilometers. h_t - 1.1 m. h_r - 0.3 m.

Grindstone Island, Quebec

Site: Located on Grindstone Island near Cap-Aux-Meules, approximately 7 km. from the airport on Alright Island. h_t - 1.2 m. h_r - 0.3 m.

Hall Beach, Northwest Territories

Site: An airport on the east side of Melville Peninsula between Foster Bay and Parry Bay. Terrain inland is generally flat, open tundra with numerous small lakes. H_z originally 10.4 m., barometer relocated September 11, 1964, new H_z - 7.3 m. h_t - 1.3 m. h_r - 0.6 m.

Hopedale, Newfoundland

Site: Located within the settlement of Hopedale. Surrounding vicinity is hilly with the Bay running in an E - W direction. h_t - 1.2 m. h_r - 0.3 m.

Inoucdjouac, Quebec

Site: Located on the east coast of Hudson Bay at the mouth of the Innuksuak River and situated on the west bank of the river. On both sides of the river are hills of mostly bare, solid rock oriented in a NE - SW line and these hills are separated by valleys of muskeg and tundra. Station originally called "Port Harrison" but changed to the present name August 1966. Relocated November 1967. H_z originally 18.1 m., barometer relocated in 1968 (no date available), new H_z - 4.9 m. h_t - 1.1 m. h_r - 0.3 m.

Inuvik, Northwest Territories

Site: An airport, approximately 11 km. SE of the townsite of Inuvik, the only settlement in the Mackenzie River Delta. H_z originally 60.8 m., barometer relocated July 1962, H_z - 62.6 m., relocated June 1969, new H_z - 62.3 m. h_t - 1.2 m. h_r - 0.3 m.

Isachsen, Northwest Territories

Site: Located in a hollow between three ridges and bounded by Louise Bay. h_t - 1.2 m. h_r - 0.5 m.

Kamloops, British Columbia

Site: An airport near the centre of a fairly narrow and deep E - W oriented valley. H_z originally 345.2 m., barometer relocated May 30, 1964, new H_z - 346.3 m. h_t - 1.2 m. h_r - 0.3 m.

Kapuskasing, Ontario

Site: An airport, approximately 5 km. W of the town of Kapuskasing on the river of the same name. In generally level, heavily wooded terrain. h_t - 1.2 m. h_r - 0.3 m.

Langara, British Columbia

Site: On the NW tip of Langara Island. The Pacific Ocean lies about 39 m. below the station. H_z originally 35.1 m., barometer relocated November 30, 1967, H_z - 29.5 m., relocated November 28, 1968, new H_z - 35.1 m. h_t - 1.2 m. h_r - 0.3 m.

Lethbridge, Alberta

Site: An airport 5 km. S of the City of Lethbridge in generally level agricultural terrain and about 80 km. E of the Rocky Mountains. H_z originally 919.0 m., barometer relocated November 1965, new H_z - 915.6 m. h_t - 1.1 m. h_r - 0.3 m.

Maniwaki, Quebec

Site: In a small town on the Gatineau River in rolling, wooded country with many small lakes. h_t - 1.1 m. h_r - 0.3 m.

Masset, British Columbia

Site: Situated on the north side of Masset Inlet about 2.5 km. S of the north shore of Graham Island in the Queen Charlotte Islands. Station closed March 1968. h_t - 1.0 m. h_r - 1.7 m.

Mistassini Post, Quebec

Site: Surrounding country is heavily wooded and relatively flat. h_t - 1.1 m. h_r - 0.3 m.

Montreal, Quebec

Site: On the campus of McGill University in downtown Montreal surrounded by tall buildings and sky scrapers. h_t - 1.2 m. h_r - 0.3 m.

Montreal/Dorval, Quebec

Site: An airport located in the centre of a broad valley of the St. Lawrence which lies between the Laurentian Plateau to the north and the Appalachians to the south. Surrounding area is mainly flat and level, with the exception of Mount Royal, which is located 11.2 km. to the ENE at an elevation of 229 m. H_z originally 35.7 m., barometer relocated February 20, 1961, H_z - 42.4 m., relocated July 11, 1966, new H_z - 32.9 m. h_t - 1.1 m. h_r - 0.3 m.

Moosonee, Ontario

Site: Located about 13 km. up the Moose River which empties into James Bay. H_z originally 10.4 m., barometer relocated December 3, 1966, new H_z - 10.3 m. h_t - 1.1 m. h_r - 0.4 m.

Mould Bay, Northwest Territories

Site: An airport on Prince Patrick Island, lying on the western fringe of the Arctic between the Arctic Ocean and Melville Island. H_z originally 19.8 m., barometer relocated January 1965, new H_z - 20.5 m. h_t - 1.4 m. h_r - 0.5 m.

Nitchequon, Quebec

Site: On a small peninsula at the north end of Nitchequon Lake in rolling, heavily wooded terrain. H_z originally 536.1 m., barometer relocated October 5, 1965, new H_z - 538.1 m. h_t - 1.1 m. h_r - 0.3 m.

Norman Wells, Northwest Territories

Site: An airport, approximately 1 km. E of the settlement on the east bank of the Mackenzie River. Terrain is flat and wooded, rising abruptly to an escarpment with heights over 760 m., about 24 km. to the north, and to heights over 275 m. about 48 km. to the south. H_z originally 77.1 m., barometer relocated June 1969, new H_z - 75.1 m. h_t - 1.2 m. h_r - 0.3 m.

North Bay, Ontario

Site: An airport located on a hill overlooking Lake Nipissing. Surrounding country is predominantly tree covered with birch, poplar and maple. H_z originally 369.0 m., barometer relocated November 25, 1963, new H_z - 363.7 m. h_t - 1.2 m. h_r - 0.3 m.

Nottingham Island, Northwest Territories

Site: On the SW tip of Nottingham Island in Hudson Strait at the NE corner of Hudson Bay. Station closed July 1970. h_t - 1.2 m. h_r - 0.8 m.

Pointe-au-Pere, Quebec

Site: Located on a flat area facing the St. Lawrence River with low hills on the south side. The exposure is fair. Station is 122 m. south of the shore. Station originally called "Father Point" but changed to the present name July 1963. h_t - 1.2 m. h_r - 0.3 m.

Port Hardy, British Columbia

Site: An airport, approximately 13 km. NW of the village of Port Hardy on the NE shore of Vancouver Island in mountainous, heavily forested terrain, with Queen Charlotte Strait to the east. H_z originally 17.9 m., barometer relocated November 7, 1963, new H_z - 19.7 m. h_t - 1.1 m. h_r - 0.3 m.

Prince Albert, Saskatchewan

Site: An airport on a relatively flat plain N of the North Saskatchewan River. H_z - 427.6 m., barometer relocated April 1968, H_z - no change. h_t - 1.1 m. h_r - 0.3 m.

Prince George, British Columbia

Site: An airport on a bench 120 m. high and 4.8 km. to the SE of the city and the confluence of the Fraser and Nechako Rivers. h_t - 1.5 m. h_r - 0.3 m.

Prince Rupert, British Columbia

Site: An airport on the west side of Digby Island which lies across the entrance to Prince Rupert Harbour. H_z originally 33.5 m., barometer relocated March 29, 1962, new H_z - 32.3 m. h_t - 1.1 m. h_r - 0.3 m.

Regina, Saskatchewan

Site: An airport on the SW edge of the City of Regina, approximately 3.2 km. SW from the central business core. h_t - 1.1 m. h_r - 0.3 m.

Resolute, Northwest Territories

Site: An airport on a peninsula on Cornwallis Island with the sea being 2.4 km. to 4.8 km. away on three sides. h_t - 1.1 m. h_r - 0.5 m.

Resolution Island, Northwest Territories

Site: Station is located on Cape Warwick, Resolution Island, accessible by air from Frobisher Bay, or by ships during the navigational season. h_t - 1.4 m. h_r - 0.3 m.

Sable Island, Nova Scotia

Site: On a small island in the Atlantic Ocean, approximately 248 km. ESE of Halifax. H_z originally 3.7 m., barometer relocated September 1, 1961, new H_z - 4.0 m. h_t - 1.4 m. h_r - 0.4 m.

Sachs Harbour, Northwest Territories

Site: An airport near the SE point of Banks Island. Terrain is flat tundra. h_t - 1.1 m. h_r - 0.5 m.

Sandspit, British Columbia

Site: An airport on a low point of land extending northward into Hecate Strait from the NE corner of Moresby Island. The terrain inland rises to heavily forested hills over 300 m. high within 8 km. H_z originally 7.6 m., barometer relocated March 14, 1963, H_z - 7.9 m., relocated April 10, 1963, new H_z - 7.6 m. h_t - 1.2 m. h_r - 0.3 m.

Schefferville, Quebec

Site: An airport located about 0.8 km. from the centre of the town of Schefferville. Surrounding country is rather well open. Station originally called "Knob Lake" but changed to the present name July 1967. H_z originally 512.4 m., barometer relocated March 25, 1963, new H_z - 521.5 m. h_t - 1.2 m. h_r - 0.7 m.

Sept-Iles, Quebec

Site: An airport, approximately 11 km. ENE of the town of Sept-Iles on the north shore of the St. Lawrence River. Terrain is generally flat and wooded, rising to hills over 300 m. high within 16 km. to the N and NW. H_z originally 55.8 m., barometer relocated June 7, 1961, new H_z - 56.1 m. h_t - 1.1 m. h_r - 0.4 m.

Shearwater, Nova Scotia

Site: An airport, approximately 800 m. from the north shore of Halifax Harbour. The terrain rises steeply from the shore to the plateau of the airport then gradually to rolling hills to the north. h_t - 1.1 m. h_r - 0.3 m.

Stephenville, Newfoundland

Site: An airport, approximately 1.6 km. inland from St. Georges Bay. h_t - 1.3 m. h_r - 0.3 m.

Sydney, Nova Scotia

Site: An airport, approximately 13 km. E of the City of Sydney and about 5 km. S of Indian Bay. Terrain is flat and sparsely forested. H_z originally 59.1 m., barometer relocated November 1967, new H_z - 62.0 m. h_t - 1.1 m. h_r - 0.3 m.

The Pas, Manitoba

Site: An airport located on a rise of land with the surrounding country being fairly flat. The terrain consists of lakes, forests, muskeg and marsh. h_t - 1.1 m. h_r - 0.3 m.

Torbay, Newfoundland

Site: An airport outside the city limits, approximately 11 km. NE from the central core. h_t - 1.1 m. h_r - 0.5 m.

Toronto, Ontario

Site: Located in the central core of the City of Toronto. H_z originally 121.6 m., barometer relocated June 4, 1965, new H_z - 115.7 m. h_t - 1.2 m. h_r - 0.3 m.

Toronto/Malton, Ontario

Site: An airport located on a mainly flat, but gently southeasterly sloping plain that drops to Lake Ontario. H_z originally 175.1 m., barometer relocated March 22, 1963, H_z - 175.2 m., relocated April 16, 1964, new H_z - 172.5 m. h_t - 1.2 m. h_r - 0.4 m.

Trout Lake, Ontario

Site: Located on the eastern tip of Post Island which is approximately 4.8 km. wide and 6.4 km. long. h_t - 1.4 m. h_r - 0.4 m.

Vancouver, British Columbia

Site: An airport on the south side of Sea Island in the Fraser River delta near the City of Vancouver. Terrain is flat, but rising inland to the NW to mountains ranging from 760 m. to 1370 m. high within 24 km. h_t - 1.1 m. h_r - 0.3 m.

Victoria, British Columbia

Site: On the top of Gonzales Hill in the City of Victoria at the southern tip of Saanich Peninsula on Vancouver Island. h_t - 1.1 m. h_r - 0.3 m.

Watson Lake, Yukon Territory

Site: An airport on the north shore of Watson Lake. H_z originally 685.0 m., barometer relocated June 5, 1962, new H_z - 686.8 m. h_t - 1.2 m. h_r - 0.3 m.

Whitehorse, Yukon Territory

Site: An airport near the town of Whitehorse on the Alaska Highway in the flat valley of the Yukon River, with mountains rising to over 1524 m. high within 8 km. on either side of the valley. h_t - 1.1 m. h_r - 0.3 m.

White River, Ontario

Site: Located in the NW section of the town of White River. Surrounding terrain is hilly with numerous lakes and rivers. h_t - 1.2 m. h_r - 0.3 m.

Winnipeg, Manitoba

Site: An airport, approximately 8 km. from the central core of the City of Winnipeg. Surrounding country is very flat with heights of land varying by not more than 4.5 m. from station elevation. H_z originally 241.0 m., barometer relocated November 12, 1963, new H_z - 238.4 m. h_t - 1.1 m. h_r - 0.3 m.

MEXICO

MEXICO (32 stations)

The meteorological tables presented here are, for the most part, summaries of observations taken daily at 7, 14, and 21 hours local time. The monthly total rainfall is the sum of the daily readings taken at 0800.

Thermometers are installed in wooden shelters at 1.5 meter elevation. Rain gages, diameter 0.226 meters, are installed 1.00 meter above the ground.

The height above sea level for each station has been determined either from levels furnished by the Railway Company or by calculations using simultaneous barometric observations between the respective meteorological station and other observatories where height is known. Latitudes and longitudes are taken from official sources.

Data for Mexico City are now furnished under the title of Ciudad de Mexico.

UNITED STATES

UNITED STATES contiguous (100 Stations)

GENERAL: Station names, elevations, and coordinates given in the table headings are those in use at the end of 1970 or the last year for which data are published.

For stations having pressure data, the value H_z, height of the barometer above mean sea level, is used in the heading; for stations without pressure data, the elevation is H, height of the ground above mean sea level at the station.

STATION PRESSURE: Monthly means of station pressure were computed using all digitized observations available (TD 1440) as input, and applying the formula,

$$P_{Hpc} = P_{Hp} \times \exp[(\psi_2 - \psi_1)/R\ \overline{T}^*]$$

where $\overline{T}^*$ is assumed $\approx T$ (actual temperature in °C+273.16°K). $\psi_2 - \psi_1$ = difference in geopotential meters between the station pressure observation height and the climatological station pressure height.

$R = 2.8704 \times 10^6$ erg/g°K

P_{Hp} = Station Pressure

P_{Hpc} = Climatological Station Pressure

SEA LEVEL PRESSURE: Monthly mean sea level pressures were computed by summing all observed station pressures reduced to sea level (TD 1440) and dividing by the number of observations.

TEMPERATURE: The monthly mean temperature was computed by using one half the sum of the monthly mean daily maximum and monthly mean daily minimum temperatures. The monthly mean temperatures have not been adjusted for changes in location.

PRECIPITATION: These data were measured using either a weighing rain gauge, a triple register rain gauge, or an 8 inch rain gauge.

LAKE LEVELS

NORTH AMERICA

Authority: U.S. Department of Commerce
NOAA - National Ocean Survey
Lake Survey Center

General: Mean monthly Great Lakes levels are in meters above mean water level at Father Point, Quebec, International Great Lakes Datum (1955). For the convenience of those requiring the data in feet, the conversion factor 1 meter = 3.2808 feet may be used.

LAKE ERIE
Site of reading: Cleveland, Ohio.

LAKE HURON
Site of reading: Harbor Beach, Michigan.

LAKE MICHIGAN
Site of reading: Harbor Beach, Michigan.

LAKE ONTARIO
Site of reading: Oswego, New York.

LAKE ST. CLAIR
Site of reading: Official readings at Grosse Point Shores through December 1969 and at St. Clair Shores beginning January 1970.

LAKE SUPERIOR
Site of reading: Marquette, Michigan.

LAKE ERIE UNITED STATES

UNITED STATES (Contiguous)

HOUGHTON'S POND

Authority: Blue Hill Meteorological Observatory, Milton 86, Massachusetts.

Site: Houghton's Pond lies 480 ft. lower than and 1 mi. ESE of the Observatory. It is a small, relatively deep, partially spring-fed pond. It is considered frozen when completely ice covered for the first time in the winter and thawed when less than 1/10 ice covered for the first time in the spring. The pond has been known to refreeze after thawing. The catchment area is 1.6 sq. km., and pond area is 0.12 sq. km. Maximum depth is approximately 14 m.

LAKE CHAMPLAIN

Authority: National Weather Service Office, Burlington, Vermont.

Data: Dates of closing of navigation by ice between Burlington, Vermont and Port Douglas, New York are given. Most of these data were furnished by the Champlain Transportation Company. Mean values are computed excluding the years when the ice failed to close the route.

SUNSPOT NUMBERS

STATION NOTES, AMERICAN RELATIVE SUNSPOT NUMBERS

NORTH AMERICA

Authority: National Oceanic and Atmospheric Administration.

General: Beginning with January 1951 American Relative Sunspot Numbers - Monthly Means R_A' were recomputed against Zurich as a standard. There are no comparable values prior to this. These numbers, available through the American Association of Variable Star Observers, are called American even though data are received from observers outside the Western Hemisphere. The American numbers fulfill the need for a readily available value equivalent to but not supplanting the Zurich data. Prior to the 1957-60 volume only data from Zurich were published in this series.

Individual daily reports from a selected group of observers are multiplied by the proper coefficient to convert the individual values to the Zurich scale which is based on the system originated by Wolf. The values are weighted relative to one another to arrive at the daily American sunspot numbers R_A' and the monthly value is the average of the daily values. Further details concerning these data are given in the monthly report, "Solar Geophysical Data", National Oceanic and Atmospheric Administration.
